

Princípio de Máximo para EDPs Estocásticas com Coeficientes Localmente Monótonos

EDSON ALBERTO COAYLA TERAN *

Abstract

O objetivo deste trabalho é derivar um princípio de máximo para um problema de controle ótimo governado por uma equação diferencial parcial estocástica (EDPE) com coeficientes localmente monótonos. Em particular, condições necessárias para otimalidade para este problema de controle estocástico são obtidas por meio do uso da equação diferencial parcial estocástica para atrás.
